

play-tune
Tune Player for CP/M (AY-3-8910/YM2149)

Simple PT2/PT3/MYM music player based on "Tune" application from RomWBW

Requirements

- * CP/M 2.2 or compatible operating system
- * Z80 CPU with 7.3MHz clock (typical for RC2014 machines)
- * 64KB RAM

Credits

Tune Player for CP/M uses code from
<https://github.com/wwarthen/RomWBW/blob/master/Source/Apps/Tune/Tune.asm>

- * Wayne Warthen -- RomWBW Tune Player
- * S.V.Bulba -- PTxPlayer
- * Marq/Lieves!Tuore -- MYMPlay

Changes from RomWBW "Tune"

The original program is heavily dependent on RomWBW's HBIOS and hardware auto-detection, making it completely non-working on plain CP/M hardware.

- * Code semi-automatically translated to dialect understood by SLR Assembler (No crosscompiler needed).
- * Removal of dependencies on RomWBW (HBIOS calls -- including hardware autodetection and Z180 code).
- * Displays information about played file (PT3 only)
- * It's smaller
